#

As a member I want to be able to log in to the site.

login

Waiting

The Members' Area link in the main navigation will link to a new login page, with fields for username and password. These will be validated by a web service provided by TSA. The web service will return information about which groups the member can manage.

Once logged in, the member arrives at the dashboard, which displays a selection of relevant information, such as recently viewed resources and local volunteer positions.

A welcome message and log out button will be displayed in the header when a member is logged in.

Tasks

  #   Login page doctype and template
  #   Log in using web service
  #   Welcome message and logout button
  #   Dashboard doctype and template (see #3)

Comments

  #   Need to figure out whether to use Umbraco membership, or store information in custom table, or simply reference id provided by web service

          Neil Cumpstey at 26/06/2013 12:48

#

As a member I want to be able to navigate around the secure area of the site.

login

Waiting

Links to the member#s profile, group management page, resource library, programmes and activities are displayed in the navigation, as well as links to several information pages.

#

As a member I want to see a lot of useful information on a handy dashboard.

login

Waiting

The dashboard will contain the following elements:

  #   Calendar showing programmes and activities for the member's group(s).
  #   List of the member's latest updates.
  #   List of resources most recently viewed by the member.
  #   List of volunteer positions near the member's location.
  #   Programme/activity search form.
  #   Introductory text and links to create programme and activity pages.

#

As a member I want to see what's been happening which affects me.

login

Waiting

This page shows a list of messages to the member, which have been generated when events happen on the site. The list of events which will trigger a message to be generated is:

- # Response to volunteer position or group.
- # TODO

#

As a member I want to be able to edit the details displayed on my groups' pages.

group

Waiting

Details displayed on the group page on the main site should be editable. This includes FAQs and testimonials.

There should be a help tooltip for each field, editable in the cms.

#

As a member I want to be able to see a lot of useful information about my groups on a handy dashboard.

group

Waiting

There will be a dashboard showing any recent activity, and an indication of the completeness of the information on the group page. It will show:

- # Number of responses to the open volunteer positions.
- # Number of responses to the Scout waiting list.
- # An indication of how complete the information on the group page is, and how recently it has been updated.

#

As a member I want to be able to manage any of the groups for which I have permission.

group

Waiting

On any of the pages in the group management section, details of only one group will be displayed at once. There will be a way on each page in this section of switching between the member's groups.

#

As a member I want to be able to manage the volunteer positions and responses for my groups.

group

Waiting

This page allows the member to add and edit volunteer positions for the group, and manage

responses. It will show:

- \#   List of open volunteer positions, with ability to add a new position.
- \#   List of responses to both volunteer positions and the group with an interest in volunteering. Each response will show the contact details of the responder and the point of interest (specific position or group(s)). The member will be able to add notes to the response; notes made by both the member and other members will be displayed. The member will be able to hide responses from the list.

\#

As a member I want to be able to manage the Scout waiting list and responses for my groups.

group

Waiting

This page allows the member to specify the number of available places in the group for each section, and manage responses. It will show:

- \#   List of sections, allowing the setting of the number of available places for each.
- \#   List of responses to the group with an interest in joining. Each response will show the contact details of the responder and the group(s) of interest. The member will be able to add notes to the response; notes made by both the member and other members will be displayed. The member will be able to hide responses from the list.

\#

As a member I want to be able to search a variety of types of resource in one place. I want to be able to flag resources to make them easier to find later.

resources

Waiting

It should be possible to search by keyword and by resource type. The results will be displayed in a paged list.

The member will be able to mark resources as saved, and have the option to view only the resources that they have marked so. There will be an indicator shown against the resource in the list if the member has saved it.

\#

As a member I want to see some read-only information pages in the secure area.

static content

Waiting

It will be possible to add standard article pages to the members' area navigation.

\#

As a member I want to be able to view a page for each resource.

resources

Waiting

Each resource should be visible on its own page, and editable in the cms.

Tasks

- \#   Object model, relationships and database structure

- # Activity doctype, template and cms edit form
- # Award doctype, template and cms edit form
- # Badge doctype, template and cms edit form
- # Equipment doctype, template and cms edit form
- # Guidance doctype, template and cms edit form
- # Method doctype, template and cms edit form
- # Permit doctype, template and cms edit form
- # Role doctype, template and cms edit form
- # Rule doctype, template and cms edit form
- # Section doctype, template and cms edit form
- # Training doctype, template and cms edit form
- # Training module doctype, template and cms edit form
